Welcome to *Flipside.*

You're one of the first people making mixtapes on Flipside. Five minutes gets you from nothing to a tape in a friend's hands. Then tell BC what happened.

Get going

1 Put it on your Home Screen

iPhone: open `ownyourmedia.club/flipside/app` in Safari, tap Share, then Add to Home Screen. **Android:** open it in Chrome, tap ⋮, then Add to Home screen or Install app. On a computer, just open the link.

2 Sign in to Plex

On the deck, tap `Menu`, then Settings › Music Sources › Plex. No Plex handy? Choose Demo Library and try everything with sample songs.

3 Make a tape

Press `REC`. Name it, pick a C60 or C90, and tap songs to record them. Songs too long for the room left are crossed out. When a side is full, it's full. Or turn your phone sideways on the menu side and drag songs in the **Workbench**.

4 Play it

`STOP/EJECT` opens your tape rack. Tap a tape to lift it out, press **LOAD TAPE**, then `PLAY`. Hold `REW` or `FF` to wind. `FLIP` turns it over; `⏮ RESTART` goes back to the start of the side. `▤ TAPES` shows your tapes while one plays.

5 Send it

Open the tape and choose **Send Mixtape**. The list shows people you share your Plex server with. They hear it from your music, so share your library with them in Plex first.

Try these too

- **File it in a drawer.** In the rack, lift a tape and press **ASSIGN** to put it in Morning, Road Trip or a drawer of your own. The tabs down the edge jump between drawers, and ⌕ searches.
- **Say why.** Tap a song in the deck's **SONGS** list and write a line about why it's on the tape. It travels with the tape.
- **Put it on the TV.** Screen Mirror your phone, then Menu › **TV Mode**. The tape, the song and your note, made for the couch.
- **Plan one first.** Sketch Pad on the menu side: fill a crate, pick a story arc, put the keepers in order, and let the Mixtape Coach help. Then Make It a Tape.
- **A song you don't own yet.** On a tape's menu, choose + A Song You Don't Own. Buy it, add it to Plex, and watch it fill in.
- **Deck colors.** Settings › Deck Color: the Sport line, Retro (Brushed Aluminum, See-Through, 80s Pastel) and Editions. Both sides of the player change.
- **Wishlist and J-cards.** Heart songs and albums you want to own (Mixtapes › Wishlist), and print a J-card for a real cassette case from any tape's menu.
- **Analog Mode.** Settings › Analog Mode puts every tape on your phone so Flipside works with no signal. Dub on Wi-Fi.

Tell BC

Press ✎ NOTE on the deck any time something breaks, gives you an idea or makes you smile. Each note is stamped with where you were. When you're ready, Menu › **Alpha › Notepad › Send All to BC**. **Alpha › What to Test** lists what BC most wants to hear about.

Broken, confusing, too small, or just right: all of it helps. No mail app? Write to `bc@runawayanchor.com`.

Good to know

- It's an alpha. Things will break. Your tapes are saved to your Plex server, so they're safe.
- Phones only start sound after a tap. If the first PLAY is silent, press it again.
- The lamp on the deck: **PLEX** is streaming, **ANALOG** is playing from your phone, **NOT DUBBED** means this tape isn't on the phone yet.
- Tape missing on another device? Mixtapes › Sync with Plex.
- A friend can't play your tape? Share your Plex music library with them, then send it again.
- Flipside updates itself. If the icon looks old, remove it and add it again.
- More help: the User's Guide in Settings, or `ownyourmedia.club/flipside/app/guide.html`
