Welcome to *Flipside.*

You're one of the first people making mixtapes on Flipside. Five minutes gets you from nothing to a tape in a friend's hands. Then tell BC what happened.

Get going

1 Put it on your Home Screen

iPhone: open `ownyourmedia.club/flipside/app` in Safari, tap Share, then Add to Home Screen. **Android:** open it in Chrome, tap ⋮, then Add to Home screen or Install app. On a computer, just open the link.

2 Sign in to Plex

On the deck, tap `Menu`, then Music Sources › Plex. No Plex handy? Choose Demo Library and try everything with sample songs.

3 Make a tape on your bench

Press `REC`, then **+ New Tape**. Name it, pick a C60 or C90, and add songs to Side A and Side B. When a side is full, it's full. Want help? Plan it first with the Coach.

4 Send it to the rack

New tapes stay on your bench until they're done. Open the **Tape** tab, check the list and press **Send to the Rack**.

5 Play it

`STOP/EJECT` opens your tape rack. Tap a tape to lift it out, press **LOAD TAPE**, then `PLAY`. Hold `REW` or `FF` to wind. `FLIP` turns it over; `⏮ RESTART` goes back to the start of the side.

6 Send it to a friend

Press `SEND MIXTAPE` on the deck. They hear it from your music, so share your Plex library with them first.

Try these too

- **File it in a drawer.** In the rack, lift a tape and press **ASSIGN** to put it in Morning, Road Trip or a drawer of your own. The color band on a tape shows its drawer group.
- **Rework a tape.** Lift it in the rack and press **REWORK**. It goes back to your bench, drawers and notes and all, until you send it back.
- **Say why.** Tap a song in the deck's **SONGS** list and write a line about why it's on the tape. It travels with the tape.
- **Put it on the TV.** Screen Mirror your phone, then Menu › **TV Mode**. The tape, the song and your note, made for the couch.
- **Plan one first.** + New Tape › Need help planning? Fill a crate, pick a story arc, put the keepers in order and let the Mixtape Coach help. Then Record It.
- **Dress up the label.** The bench's **Label** tab: one tap for a Theme, or pick each part yourself, from the Design to the Shell. ✦ Surprise Me if you can't decide.
- **On every device.** Tapes, drawers, plans and the Wishlist follow you through Plex. Works in progress show in Plexamp with a ✎.
- **Analog Mode.** Settings › Analog Mode puts every tape on your phone so Flipside works with no signal. Dub on Wi-Fi.

Tell BC

Press ✎ NOTE on the deck any time something breaks, gives you an idea or makes you smile. Write a line and press **SEND NOW**, or save it and later use Menu › **Alpha › Notepad › Send All to BC**. **Alpha › What to Test** lists what BC most wants to hear about.

Broken, confusing, too small, or just right: all of it helps. No mail app? Write to `bc@runawayanchor.com`.

Good to know

- It's an alpha. Things will break. Your tapes are saved to your Plex server, so they're safe.
- Phones only start sound after a tap. If the first PLAY is silent, press it again.
- Listening with the screen locked? Close myStereo first, so the lock screen only has Flipside on it.
- New tape not in the rack? It's still on your bench: Tape tab › Send to the Rack.
- Tape missing on another device? Sync with Plex, on your bench.
- A friend can't play your tape? Share your Plex music library with them, then send it again.
- More help: the User's Guide in Settings, or `ownyourmedia.club/flipside/app/guide.html`

Who are you making a tape for?
