ALPHA TESTER · QUICK START

Welcome to *Flipside.*

You're one of the first people making mixtapes on Flipside. Five minutes gets you from nothing to a tape in a friend's hands. Then tell BC what happened.

Get going

1 Put it on your Home Screen

iPhone: open **`ownyourmedia.club/flipside/app`** in Safari, tap Share, then Add to Home Screen. **Android:** open it in Chrome, tap ⋮, then Add to Home screen or Install app. On a computer, just open the link.

2 Sign in to Plex

On the deck, tap `Menu`, then Settings › Music Sources › Plex. No Plex handy? Choose Demo Library and try everything with sample songs.

3 Make a tape

Press `REC`. Name it, pick a C60 or C90, and tap songs to record them. Songs too long for the room left are crossed out. When a side is full, it's full.

4 Play it

`STOP/EJECT` opens the door. Tap your tape and press `PLAY`. Hold `REW` or `FF` to wind. `FLIP` turns it over.

5 Send it

Open the tape and choose **Send Mixtape**. The list shows people you share your Plex server with. They hear it from your music, so share your library with them in Plex first.

Try these too

- **Plan one first.** Sketch Pad on the menu side: fill a crate, pick a story arc, put the keepers in order, and let the Mixtape Coach help. Then Make It a Tape.
- **A song you don't own yet.** On a tape's menu, choose + A Song You Don't Own. Buy it, add it to Plex, and watch it fill in.
- **Deck colors.** Settings › Deck Color. Try the Sport line in seven colors; both sides of the player change.
- **Screen.** Settings › Screen. Match Player goes light or dark with your phone.
- **On a computer.** Switch to Desktop Mode for a big deck and a recording panel.
- **Dub to Phone.** Save a tape to your phone and play it with no signal.

Tell BC

On the menu side, choose **Alpha › Send Feedback**. Leave **Include device details** checked; it tells BC which phone and settings you had. **Alpha › What to Test** lists what BC most wants to hear about.

Broken, confusing, too small, or just right: all of it helps. No mail app? Write to `bc@runawayanchor.com`.

Good to know

- It's an alpha. Things will break. Your tapes are saved to your Plex server, so they're safe.
- Phones only start sound after a tap. If the first PLAY is silent, press it again.
- Tape missing on another device? Mixtapes › Sync with Plex.
- A friend can't play your tape? Share your Plex music library with them, then send it again.
- Flipside updates itself. If the icon looks old, remove it and add it again.
- More help: the User's Guide in Settings, or `ownyourmedia.club/flipside/app/guide.html`

Who are you making a tape for?
